

# 8. Probability

## Predicting player performance

Using the football fact sheets on pages 6-8, answer the following questions.

Yellow cards are issued to caution players. If a player is given two yellow cards during the same game then they automatically receive a red card and are required to leave the field.

1. What is the probability that Andrea Jonkheer receives a yellow card in a game?

2. What is the probability either Anna Slezák or Will Appleby receive a card in their next game?

3. If Peter Castle's red card was the result of receiving two yellow cards in a game, what is the probability that he receives at least one yellow card in the next game he plays?

4. What is the probability that both Benjamin Lange and Andrea Jonkheer receive a card in their next game?

5. What is the probability that when Lindsey Oakley shoots she scores?

6. Rank the midfielders based on the probability that their shots will successfully convert to goals.

7. Rank the defenders based the probability that they will get a yellow card in their next game.

8. If Nathalie Strobel and Amari Okeke both took six shots in a game, how many goals would you expect them to score in total?

9. In one of their next three games, what is the probability that Benjamin Lange and Lina Weber will both get a yellow card?

10. What is the probability that Lindsey Oakley gets three consecutive yellow cards over her next three games?

11. Create a tree diagram based on the statistics on Declan Fitzroy's player card as well as the following additional information:

- In any given game the probability that he shoots is 65%.
- Declan Fitzroy is twice as likely (compared to normal) to get a yellow card in games where he doesn't score.

- a. Given that Declan Fitzroy takes a shot, what is the probability that Declan Fitzroy **both** misses and gets a yellow card in a game?

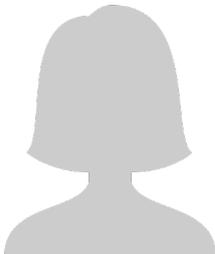

- b. Given that Declan Fitzroy takes at least one shot, what is the probability that Declan Fitzroy **either** scores or gets a yellow card in a game?

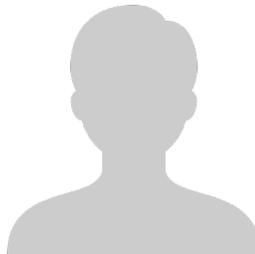

A large, empty rectangular box with a thin teal border, intended for the student to write their answer to the question.
