

2024 Mock exam schedule

Number of mocks

From 2023, 1 x mock exam is produced for each Certificate Level module.

Business Planning: Banking, Business Planning: Insurance and Financial Accounting and Reporting: UK GAAP will have 4 x mocks and all the other Professional Level mock exams will have 6 x mocks.

We will continue to provide 4 x Advanced Level mocks per year.

Distributing mocks to your students

All mocks are available for tutors to access on www.icaew.com/tutorresources, and to then distribute to students.

Certificate Level mocks are produced in Word to be shared with students at your discretion.

All registered Professional and Advanced Level students will have access to the online practice software. To access the mocks, they should use the usual link to the online practice software, found on each module resource page of the tutor website.

Their username is the letter M + ICAEW student number ie M+1234567.

Unique passwords have been set up for each Professional and Advanced Level mock exam. Students do not have access to these passwords as they are listed on the module resource pages on the tutor area of the website. Go to icaew.com/tutorresources and navigate to the module you want. You can distribute these passwords to students at your own discretion.

Links within the practice software

Links to the Data Analytics Software (DAS) and the ICAEW Bookshelf are featured in some of the practice software modules. However, these are to show where they will appear within the real exam software rather than to be used during question practice and mocks. We advise that students open and log into the DAS and ICAEW Bookshelf in a separate internet browser before they begin their question practice.
