

Business & Management

***What happens
when everything
generates data?***

22 APRIL 2020

The webinar will begin shortly...

Business & Management

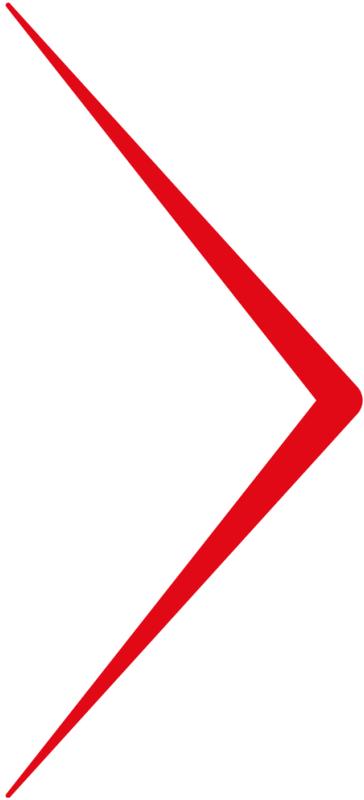

60 minute webinar: What happens when everything generates data?

Rick Payne
Business and Management Faculty

Alexandra Rehak
IoT practice head, Omdia

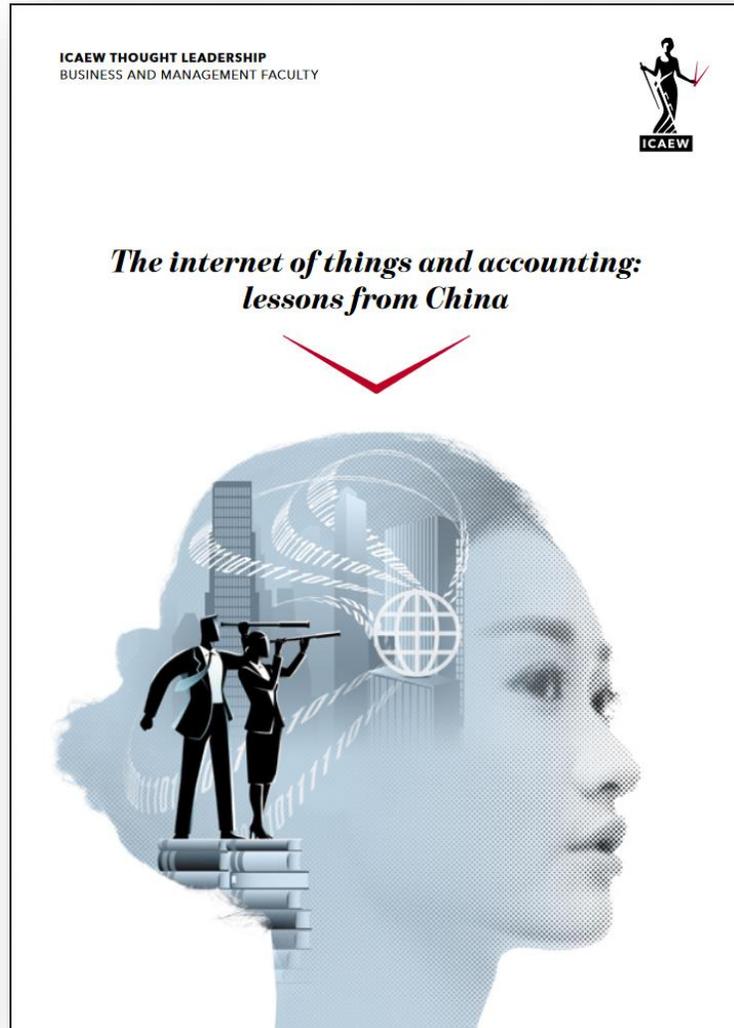

www.icaew.com/coronavirus

www.caba.org.uk

Outline

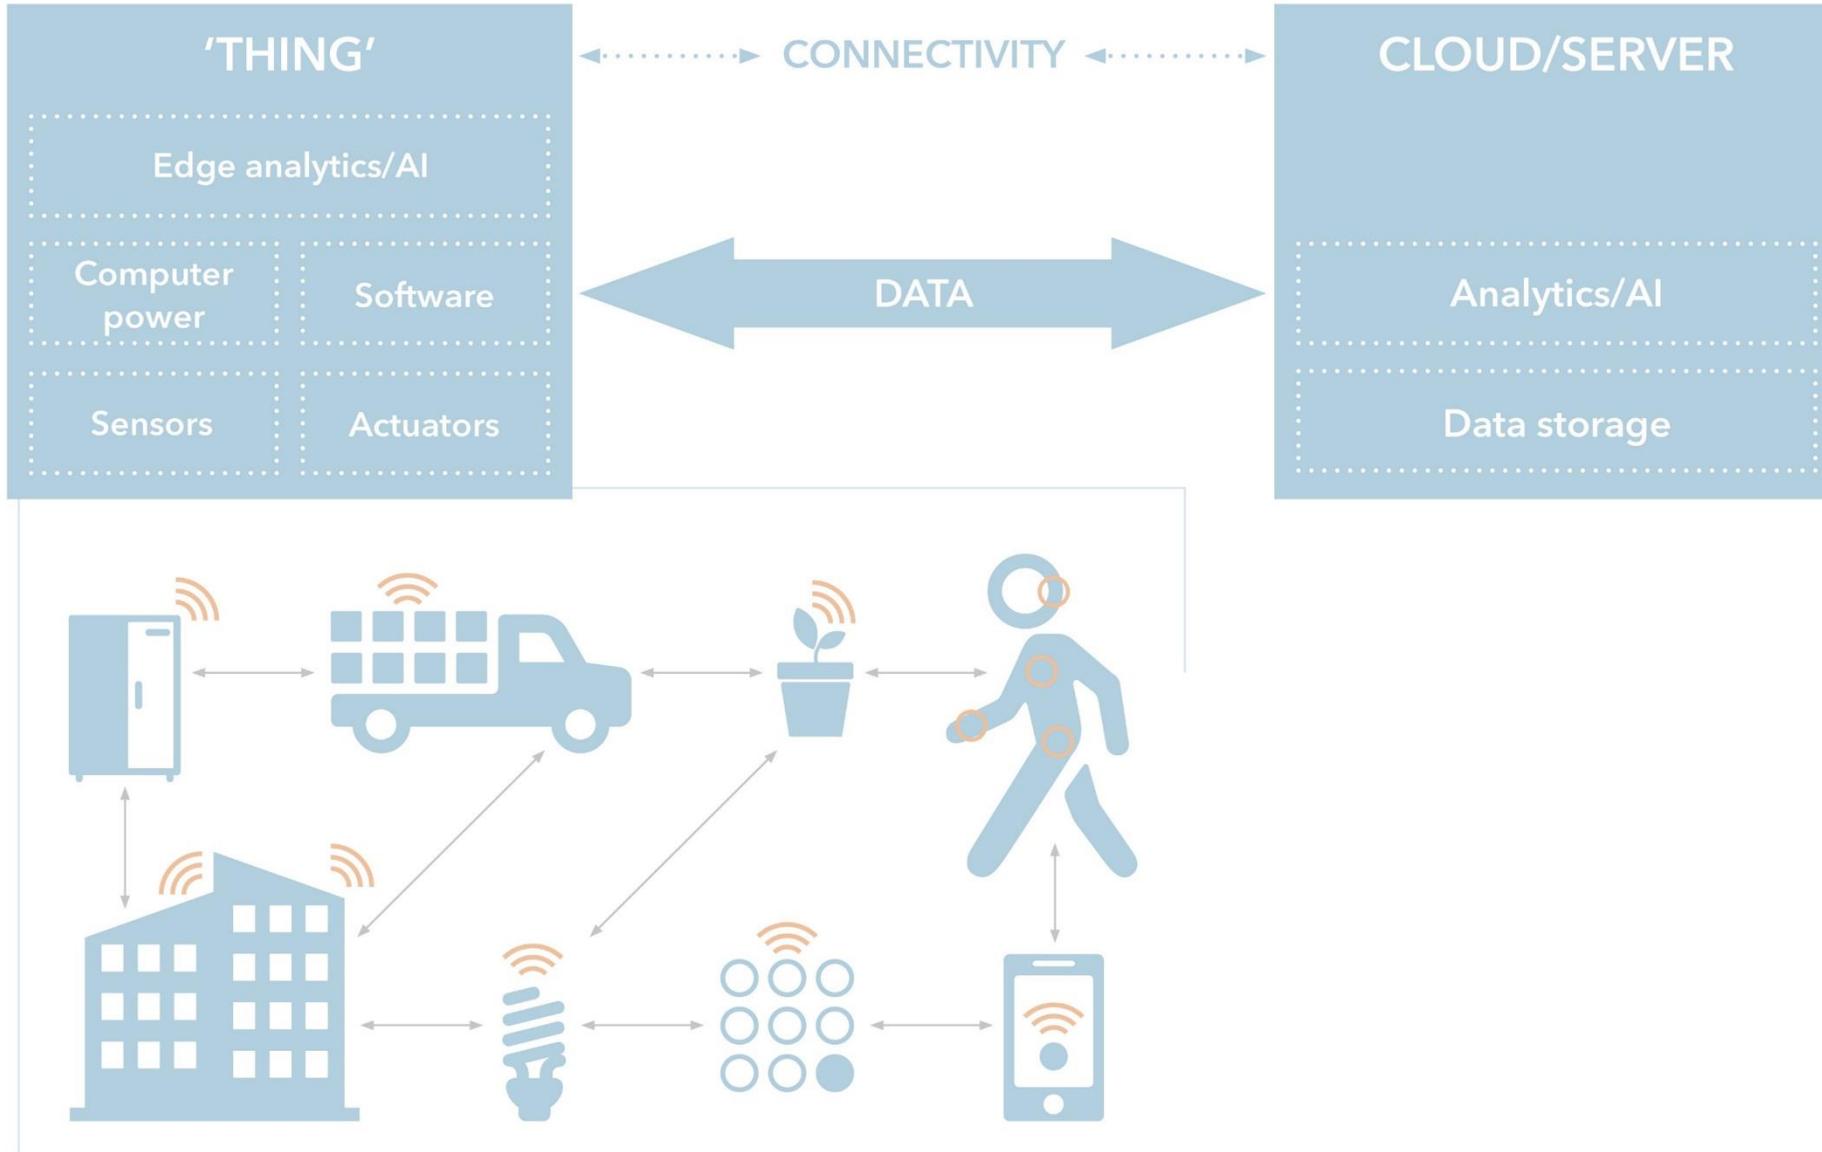

- Introduction
- How the Internet of Things (IoT) works
- The IoT ecosystem and strategy
- IoT use cases
- Knowledge, Skills and Attitudes
- Q&A

The Internet of Things and Accounting

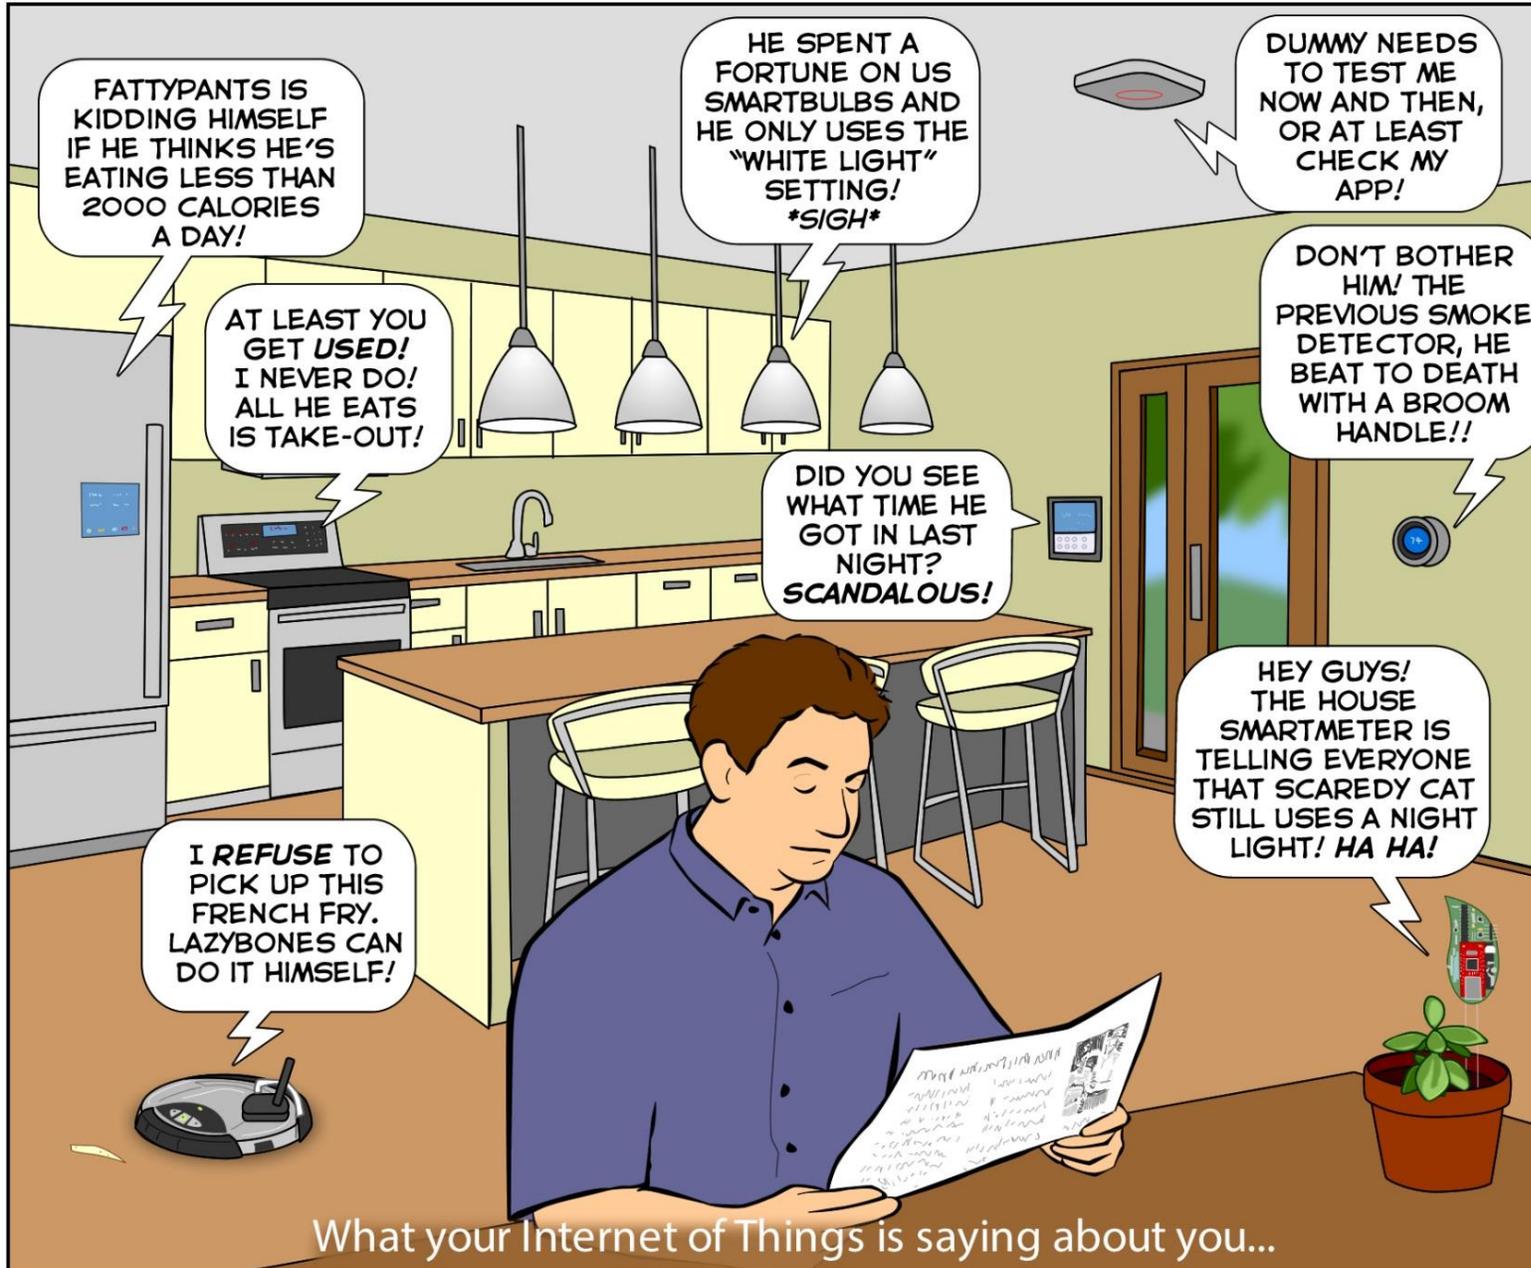

- In partnership with the Shanghai National Accounting Institute
- www.icaew.com/iotandaccounting

INTERNET OF THINGS

Importance

- Managing at a distance
- Information quality
- Digital and physical worlds brought together
- New business models
- Valuing data and accounting for ecosystems
- Finance function automation
- Climate change

Poll Question 1

To what extent is your business using the IoT?

- Not used
- Pilots only
- Fully operational in some areas
- Core to the business
- Don't know

Poll question 2

What are the main IoT uses in your business (select all that apply)

- Asset or buildings management
- Preventative maintenance
- Supply chain management
- Customer analysis
- Employee safety, health or behaviours
- Automation or robotics
- Other

ICAEW Webinar: “What happens when everything generates data?”

22 | April | 2020

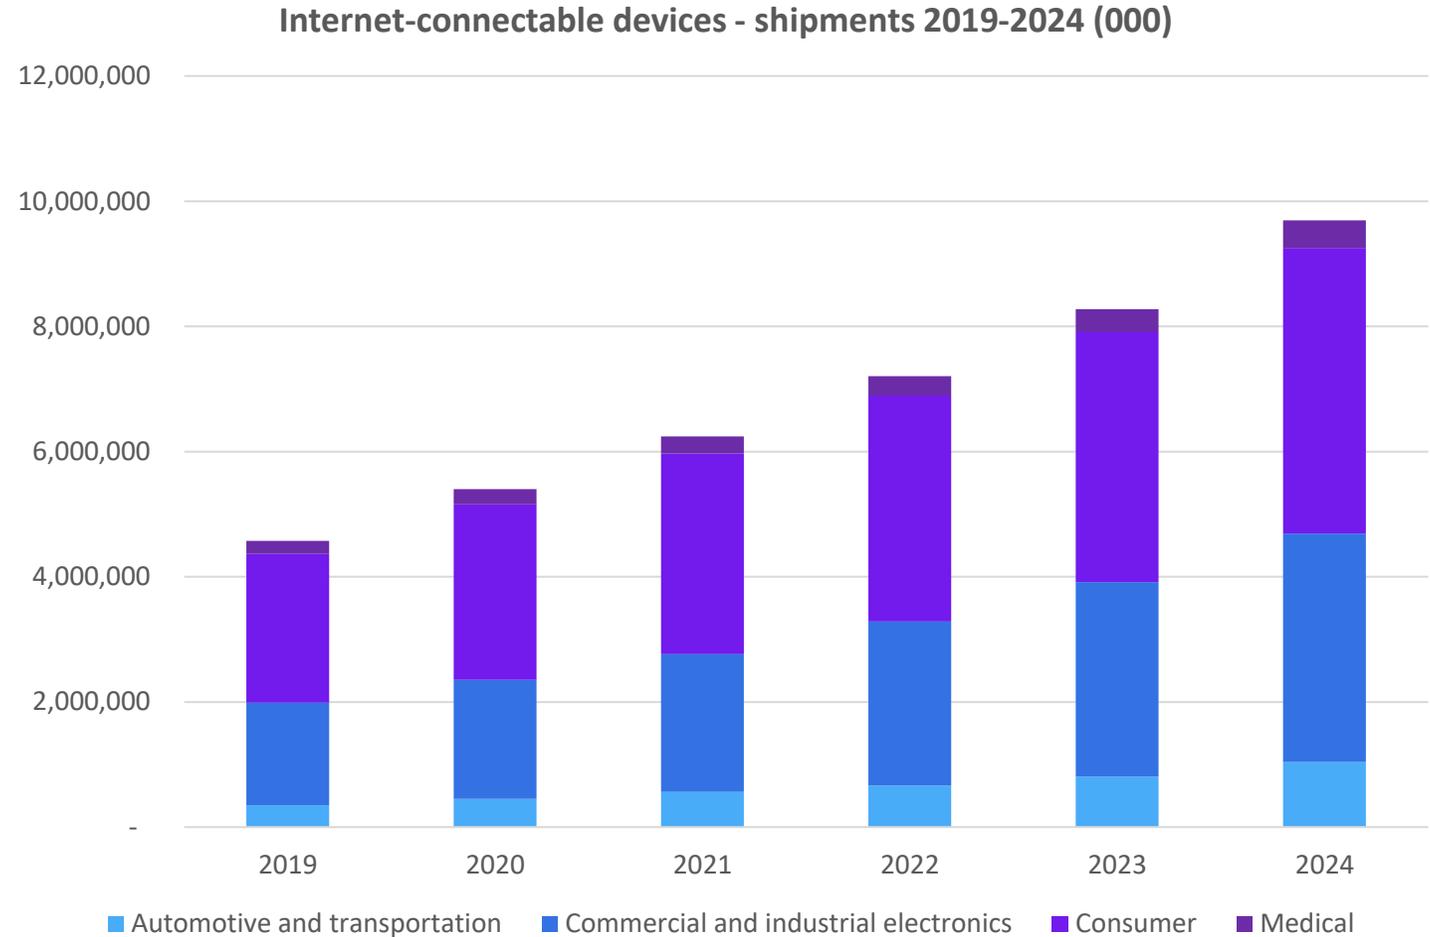

Alexandra Rehak
Practice Lead, IoT Practice
Alexandra.rehak@omdia.com

IoT market context and ecosystem

IoT market outlook: steady growth, with some sectors more dominant

Omdia's view of COVID-19 impact:

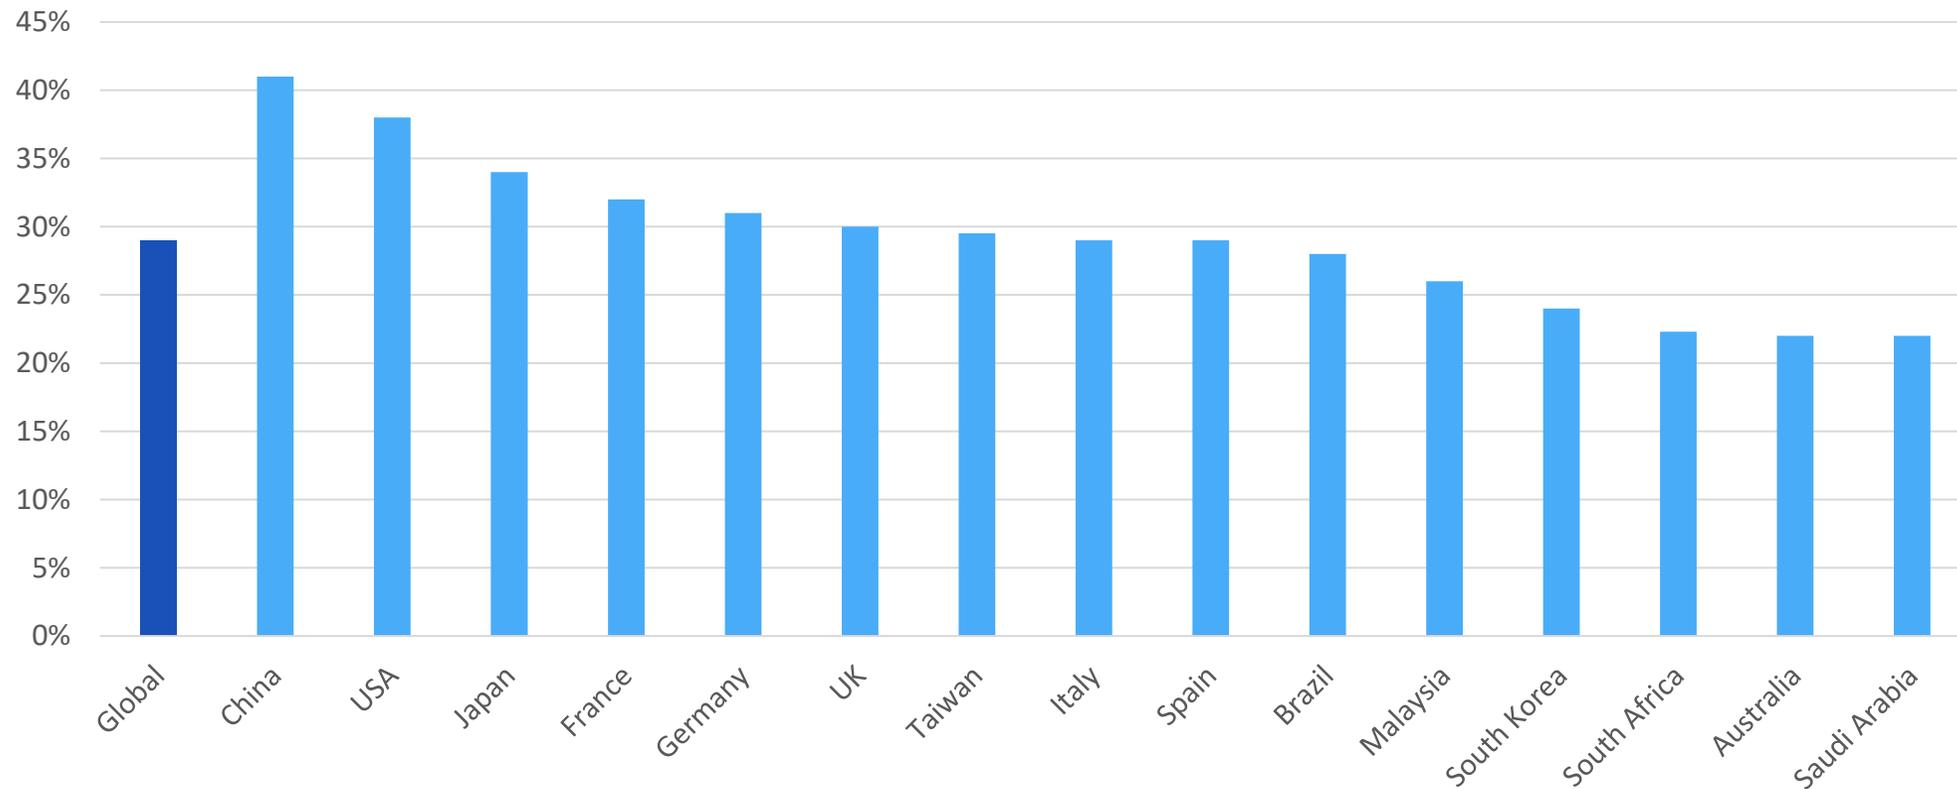

- IoT market: story of slow and steady growth
- COVID-19 impact: more delay than derailment
- Slowdowns due to demand side constraints
 - Lower consumer spend on discretionary items
 - Lower enterprise spend esp. in areas that can be postponed/capital-intensive/manpower-intensive
- **But – some bright spots where IoT spend is likely to see a boost**

Source: Omdia IoT Devices Tracker

IoT adoption is still far from universal –average adoption rate in developed markets is 29% of companies (with 50+ employees)

Indicative enterprise IoT adoption rate
(% of enterprises with 50+ employees)

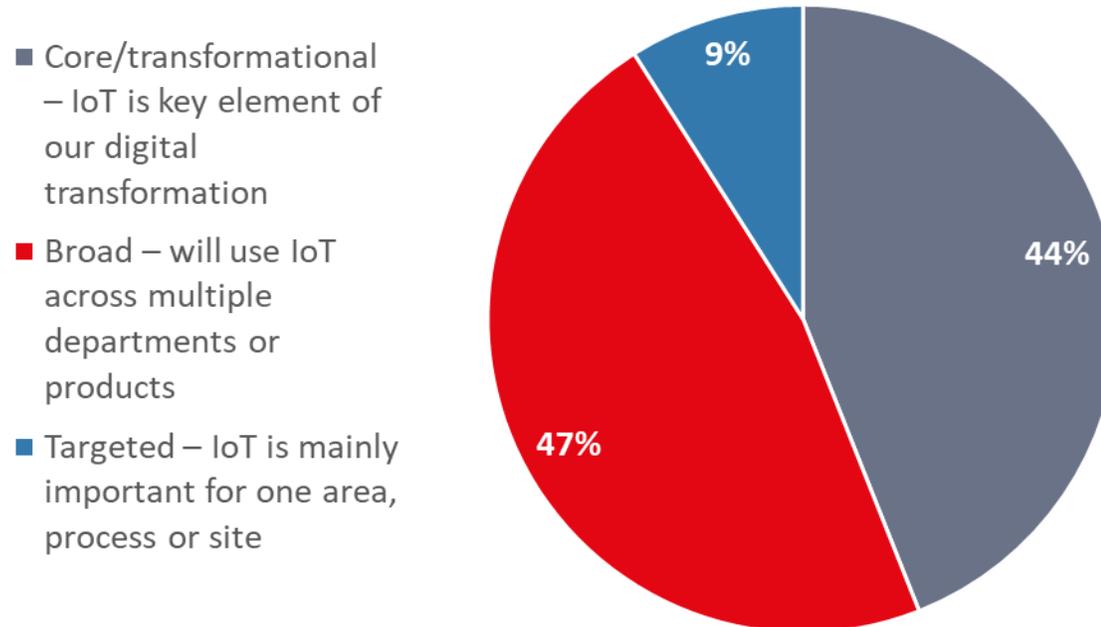

Note: % shows share of respondents deploying or contracted to deploy IoT in each of the 15 countries covered; global n = 1746 out of 5980 contacted enterprises total).
Source: Omdia IoT Enterprise Survey 2019/2020

IoT strategic approach: nearly half of enterprises say IoT is core to their digital transformation

How important is IoT in your organization's overall strategy?

Source: Omdia IoT Enterprise Survey 2019/2020

IoT deployment goals: enterprises are still likeliest to use IoT to improve existing processes or products and save costs

What is your organization's main goal, in deploying IoT?

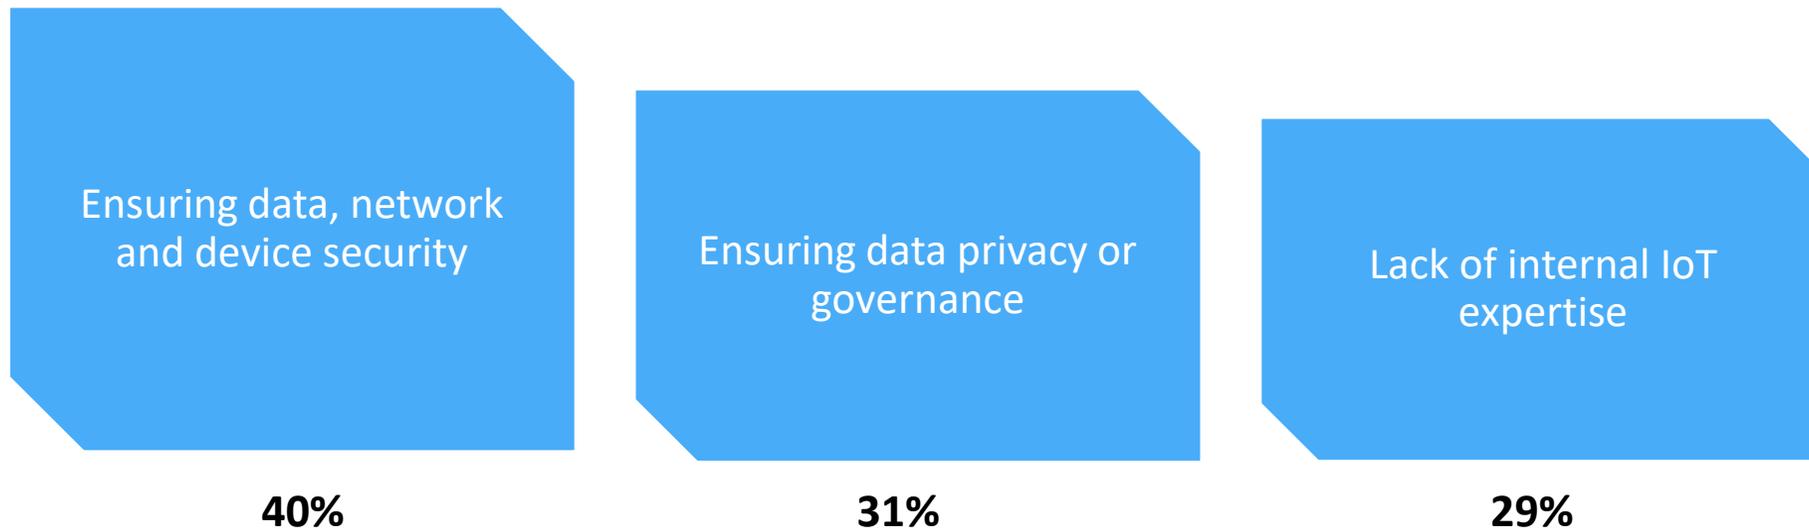

n = 1,746, respondents were asked to choose and rank their top 3 goals from a list of 10. Percentages reflect % of respondents who chose the indicated goal as rank 1,2 or 3.

Source: Omdia IoT Enterprise Survey 2019/2020

IoT pain points: enterprises identify security, data privacy concerns, and lack of internal expertise as barriers to successful IoT use

Top 3 barriers to successful IoT deployment
(% of enterprises choosing response as one of top 3)

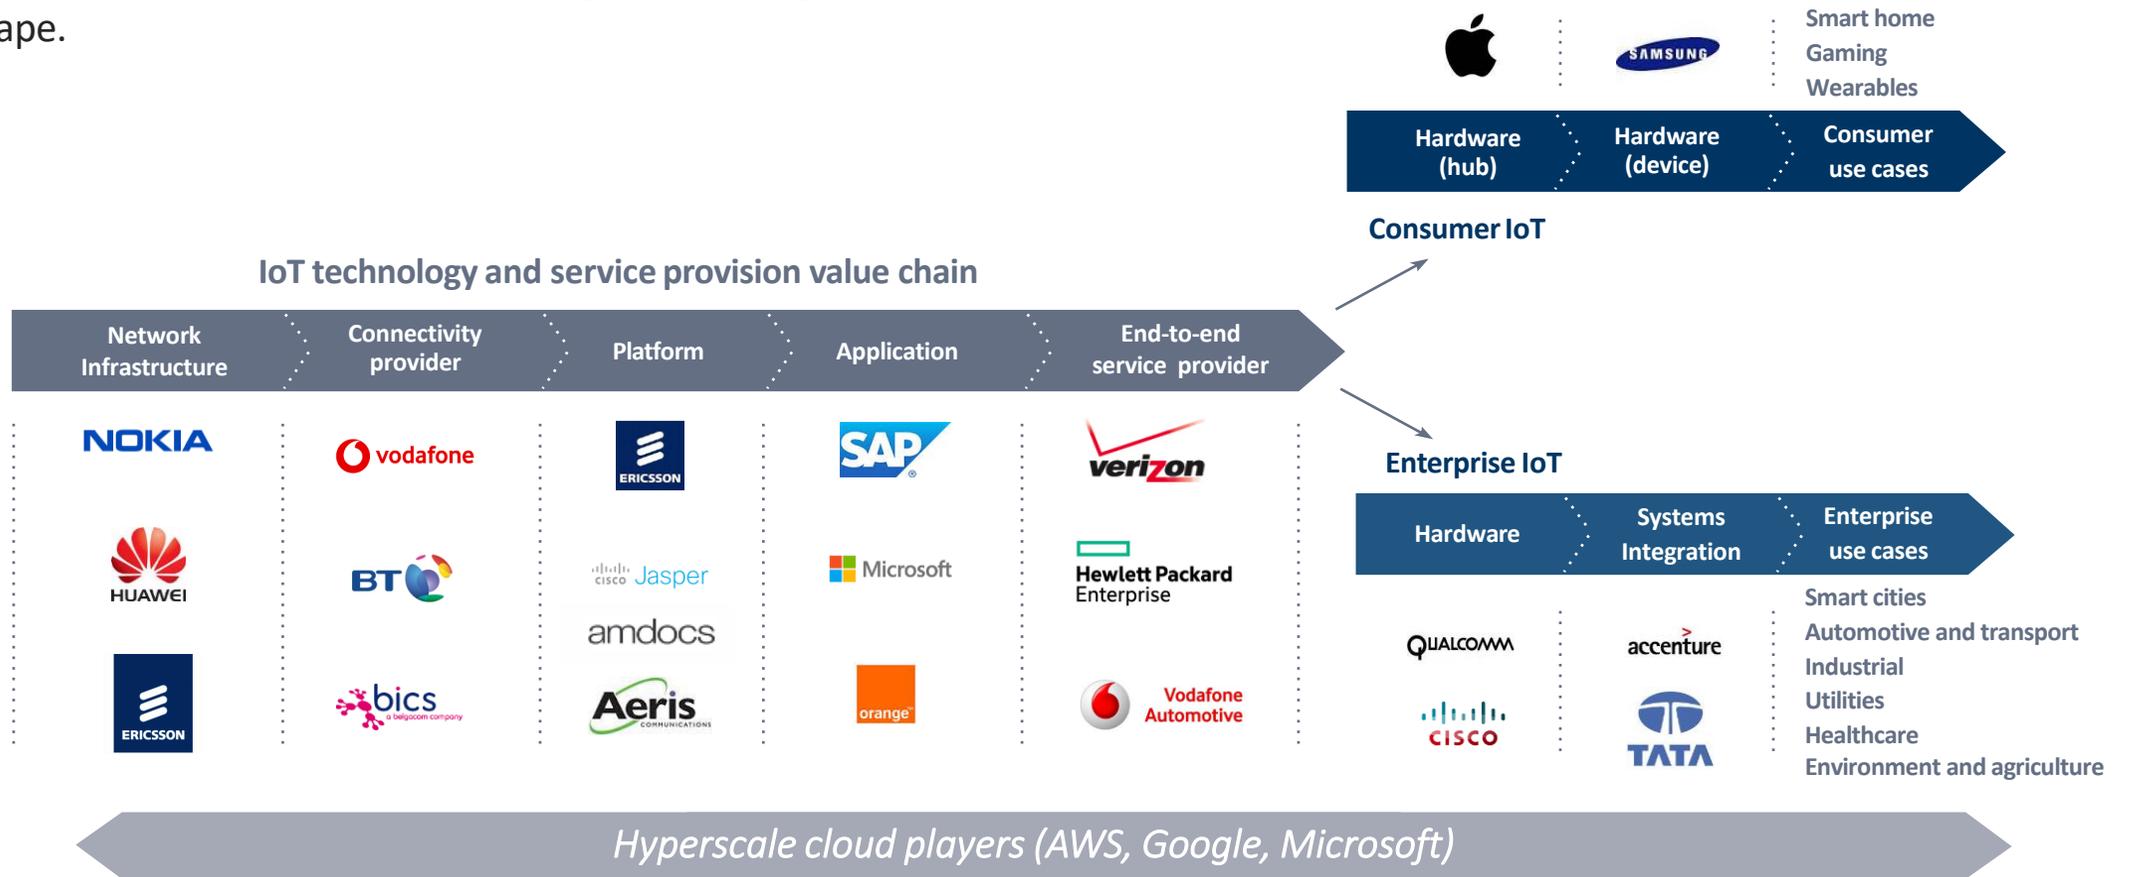

Question : What do you see as the biggest challenges to successful IoT adoption by your organisation? (choose top 3)

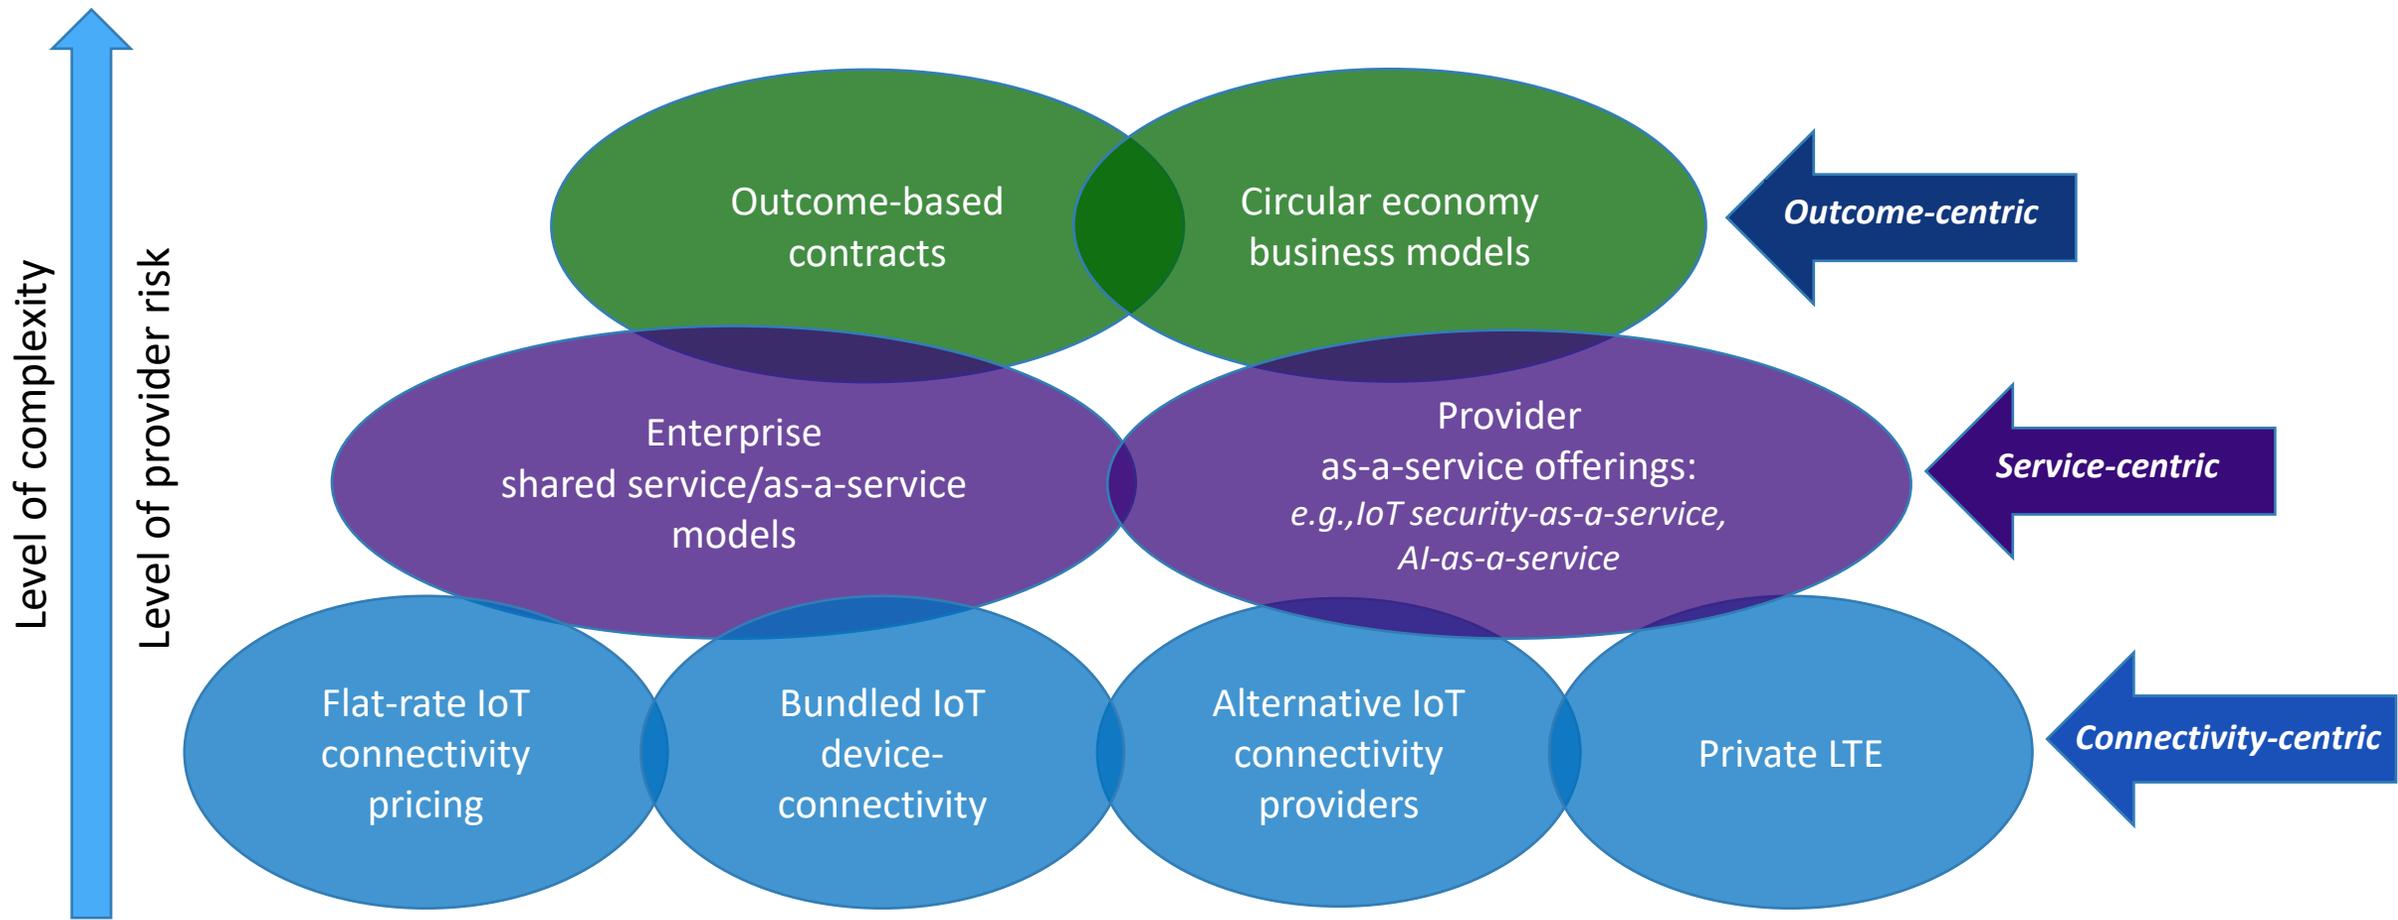

Source: Omdia IoT Enterprise Survey 2019/2020

Delivering IoT depends on a complex value chain

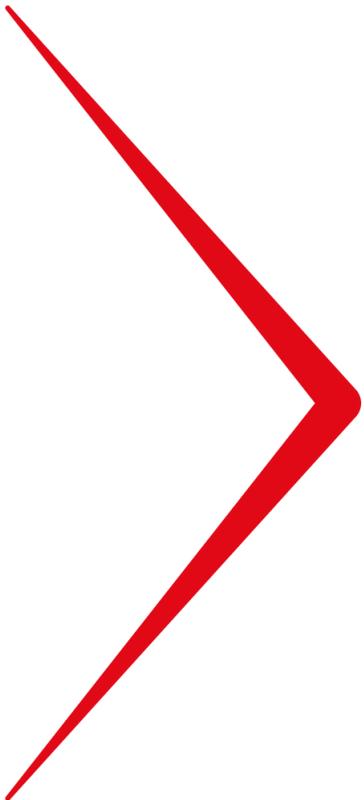

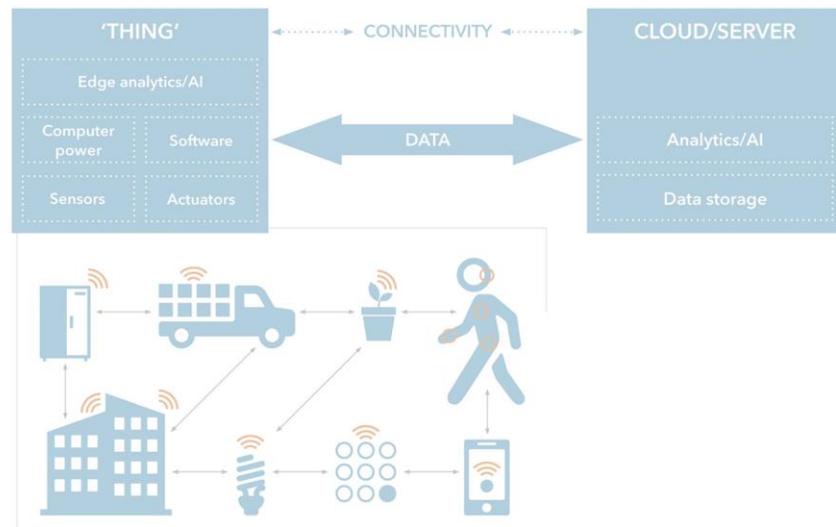

New roles and business models will emerge - and merge - across the IoT landscape.

Value chain evolution is also driving IoT business model innovation, for both enterprises and providers

IoT Use Cases

Where are the
three inch
bobbins when
you need them?

I've been sitting
in here for 18
months and I'm
still on the
balance sheet at
cost

Here, here!
we're over
here!

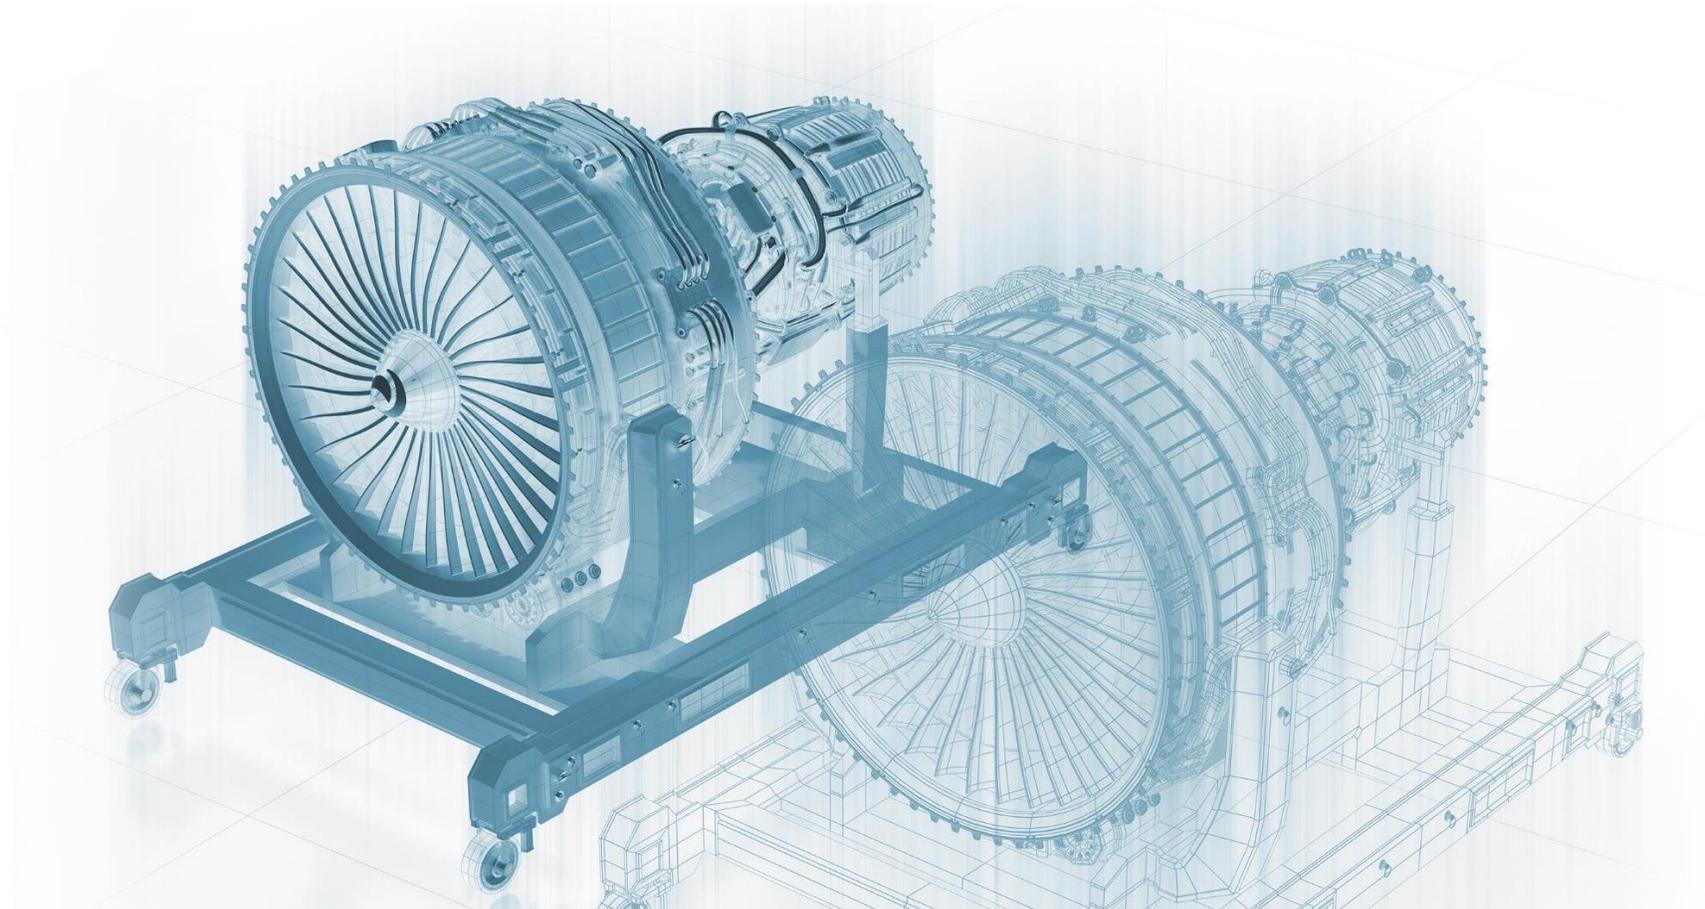

Oil, Oil, I need Oil.

This operator is a little heavy handed.

I know I had to request a full service last week.

Fan belt breaking in 10, 9, 8, ... Too late!

Digital Twins

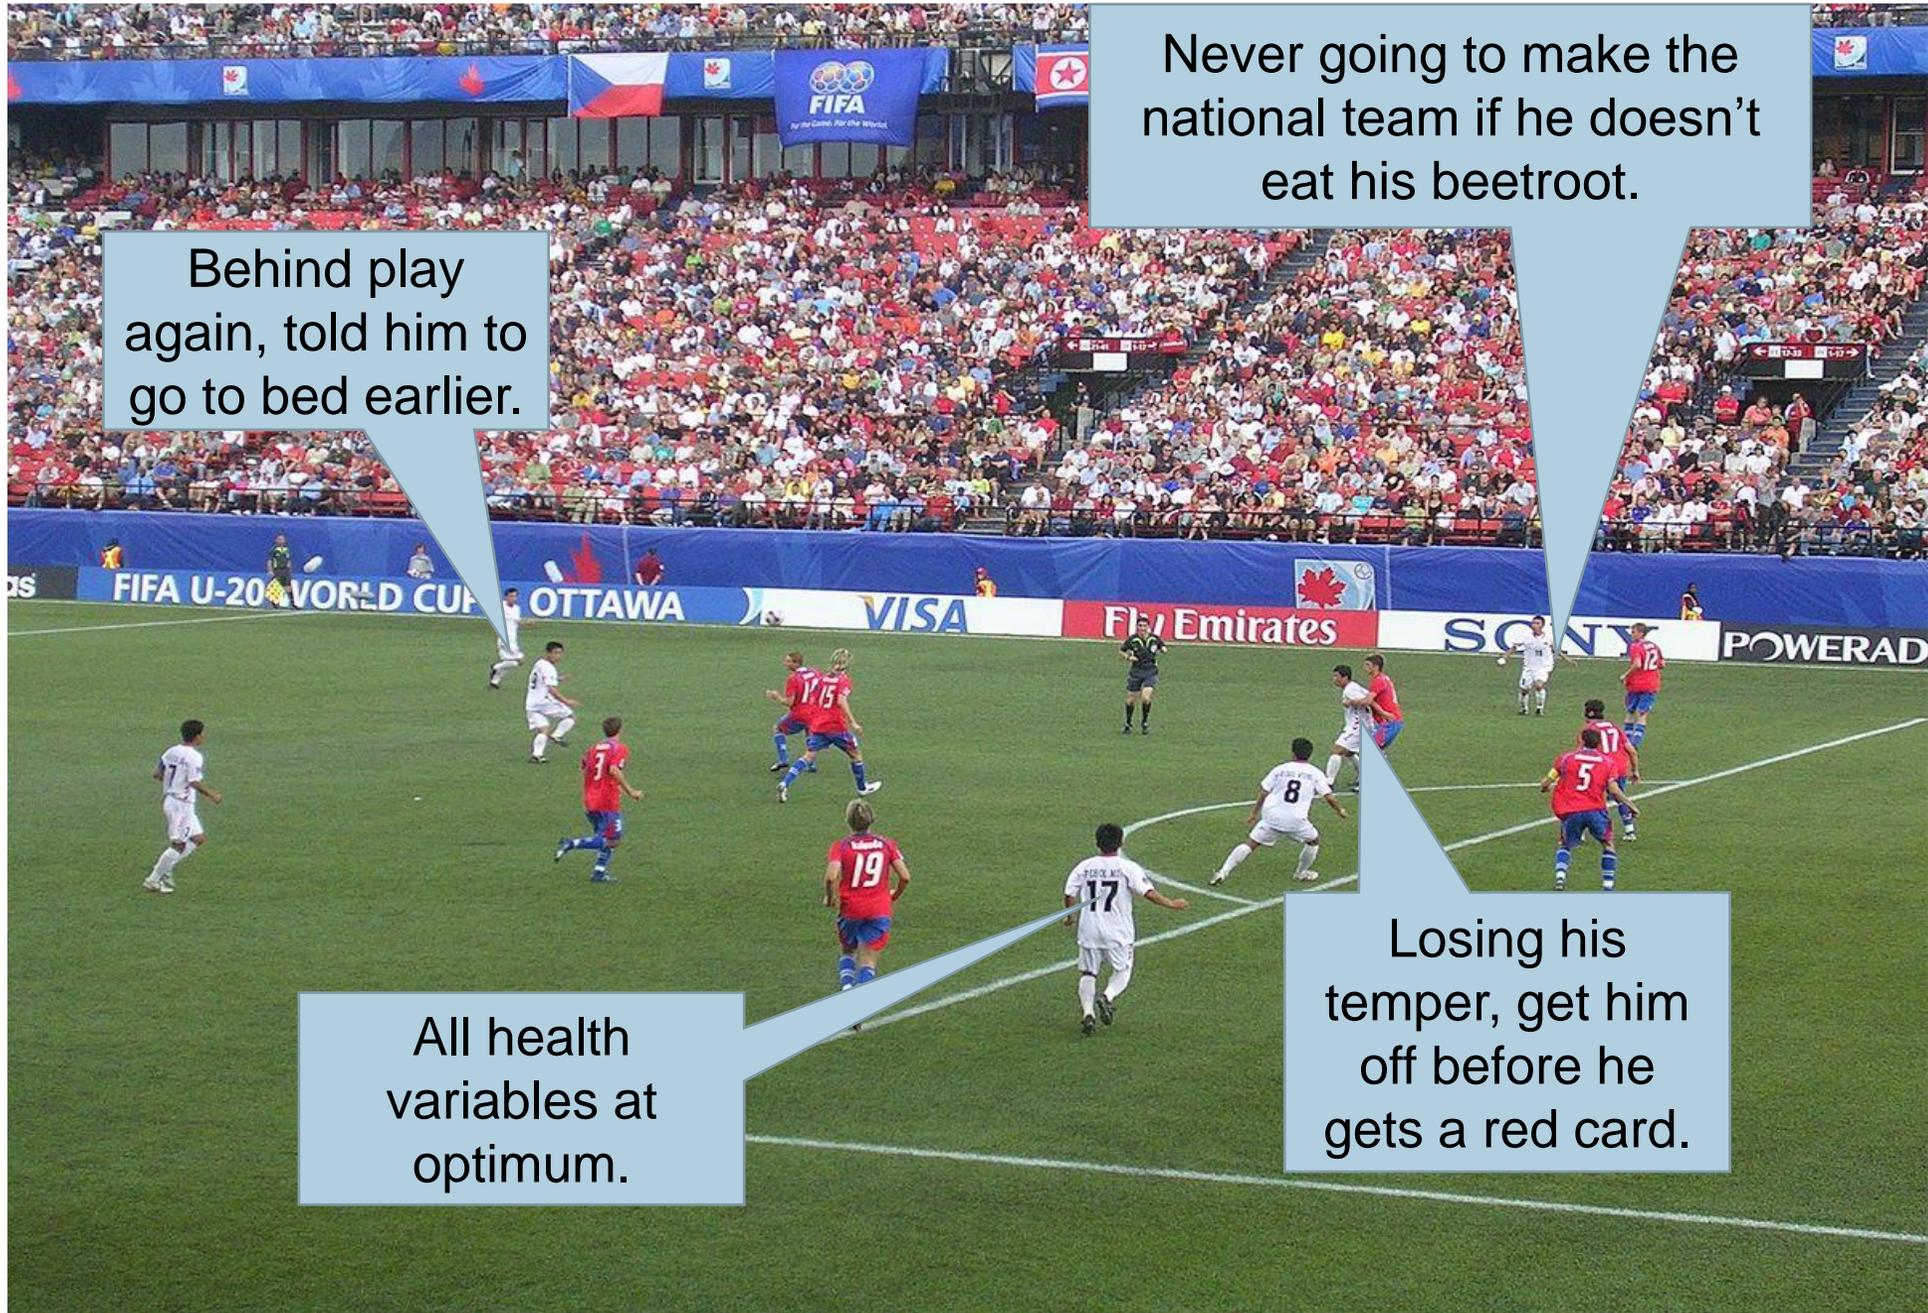

Cedalo Streamsheets

The screenshot displays the Cedalo Streamsheets interface, which is a data-driven simulation environment. It is divided into several main sections:

- 3D Simulation (Left):** A virtual factory floor with a conveyor belt system. The interface includes a top menu with 'DATEI', 'BEARBEITEN', and 'ANSICHT' options, and a bottom status bar indicating 'FACTORY I/O v2.3.5 - Ultimate Edition - offenburg'.
- Streams Admin Dashboard (Top Right):** A browser window showing the 'Stream Machine Cloud Federation' interface. It includes a navigation menu, a search bar, and a toolbar with various controls like play, stop, and refresh. The address bar shows 'localhost:8081/machines/S1ert18UdV'.
- Data Table (Bottom Right):** A table titled 'S1 - Step 743' with columns labeled IF, A, B, C, D, E, F, G, H. The table contains the following data:

IF	A	B	C	D	E	F	G	H
1								
2	Z Position	0						
3	X Position	8.384						
4								
5	Anzahl Zyklus	40						
6	Zyklus Zahler	743						
7	Taktzyklus	23						
8	Position	0						
9	Positionier-Nachlauf	-8.384						
10								
11	Factory I/O Actuators							
12	Grab	FALSE						
13	Rotate CW	FALSE						
14	Rotate CCW	FALSE						
15	Grip CW	FALSE						
16	Grip CCW	FALSE						
17	Belt	FALSE						
18	Z Set Point	0						
19	X Set Point	0						
20								
21	HQTT.PUBLISH							
22								
23	OPCUA.VARIABLES							
24								
25								
- Charts (Right):** Two line charts are displayed. The top chart, titled 'Positionier-Nachlauf', shows a fluctuating signal over time. The bottom chart, titled 'Ist- und Sollposition', shows two signals: a red line representing the actual position and a blue line representing the setpoint, both showing a periodic sawtooth pattern.

Never going to make the national team if he doesn't eat his beetroot.

Behind play again, told him to go to bed earlier.

All health variables at optimum.

Losing his temper, get him off before he gets a red card.

Post-lunch lull,
I'll drop the
temperature

When will people
learn - stay hydrated!

Diversity's not bad
but could do better

Doodles better
than he sells.

Can't fool me,
they're not
meeting notes

Warning – 6 coffees
limit reached

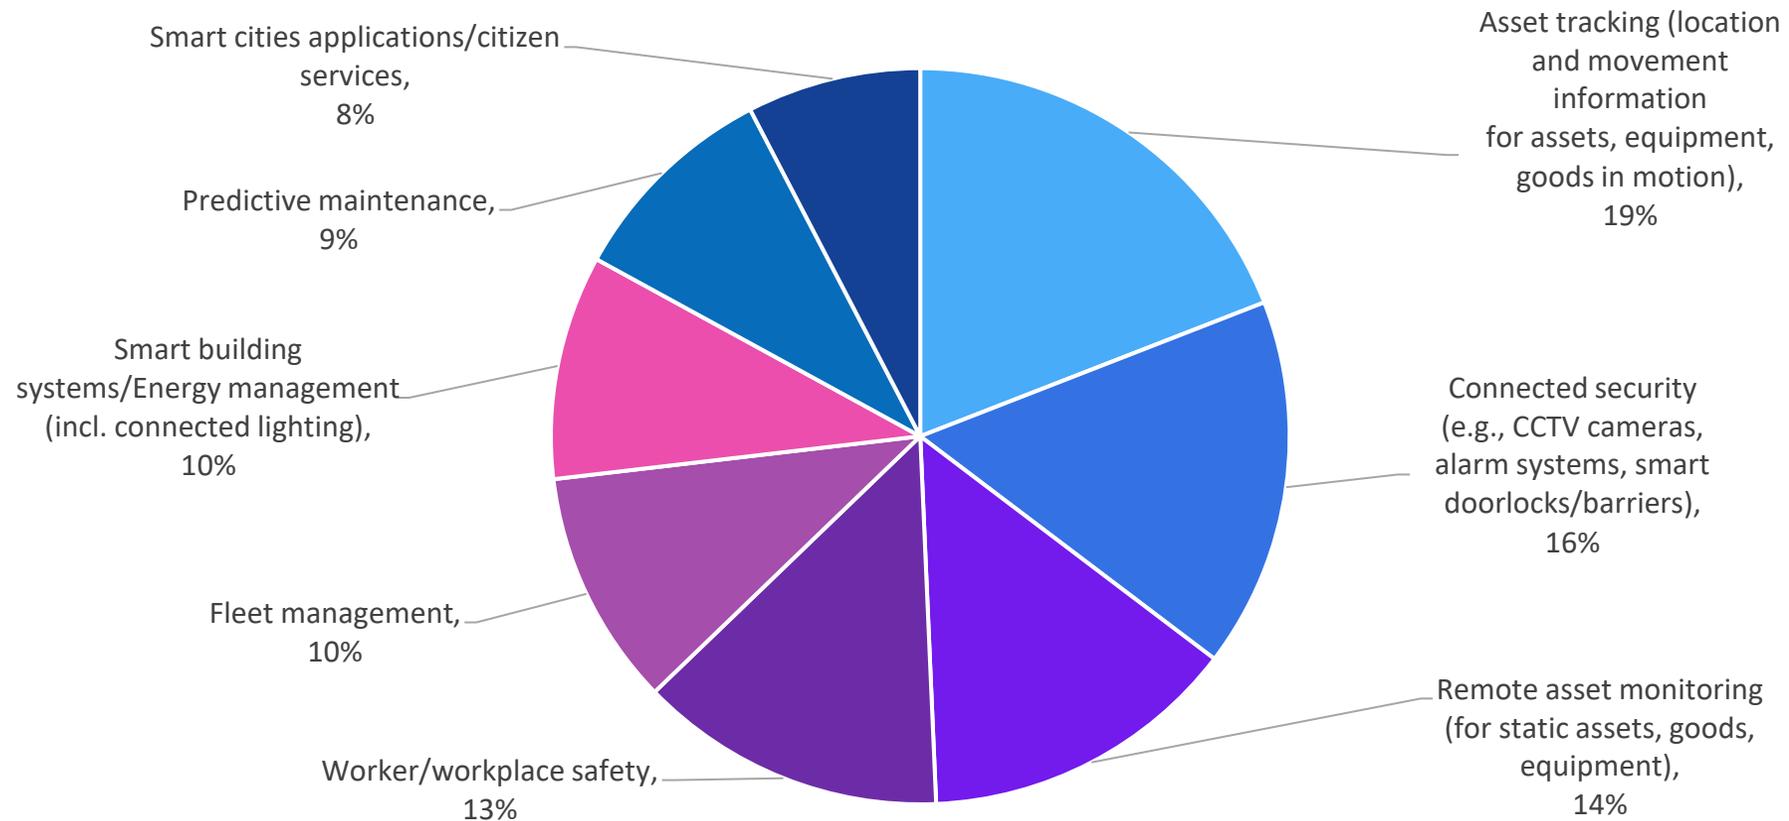

Collaboration
score 8/10

IoT applications and use cases

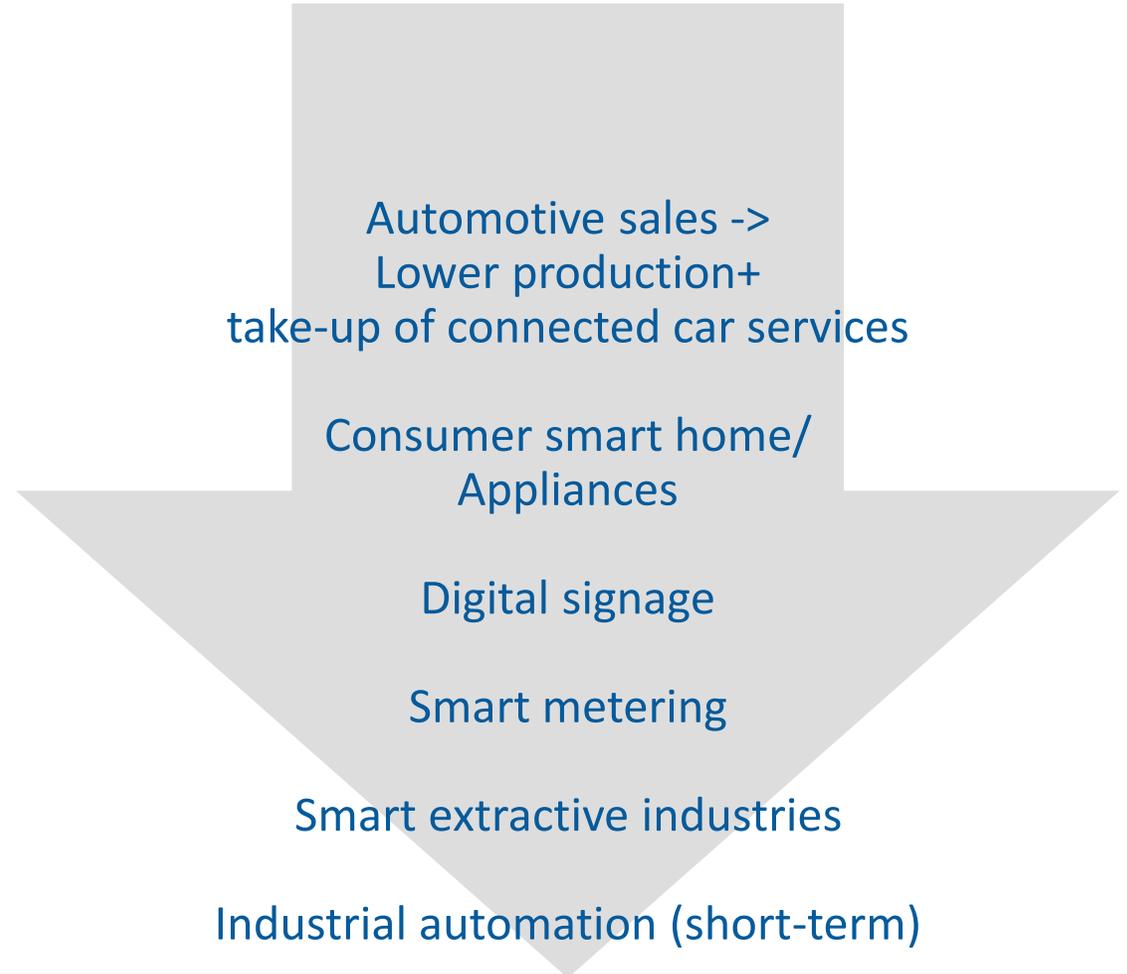

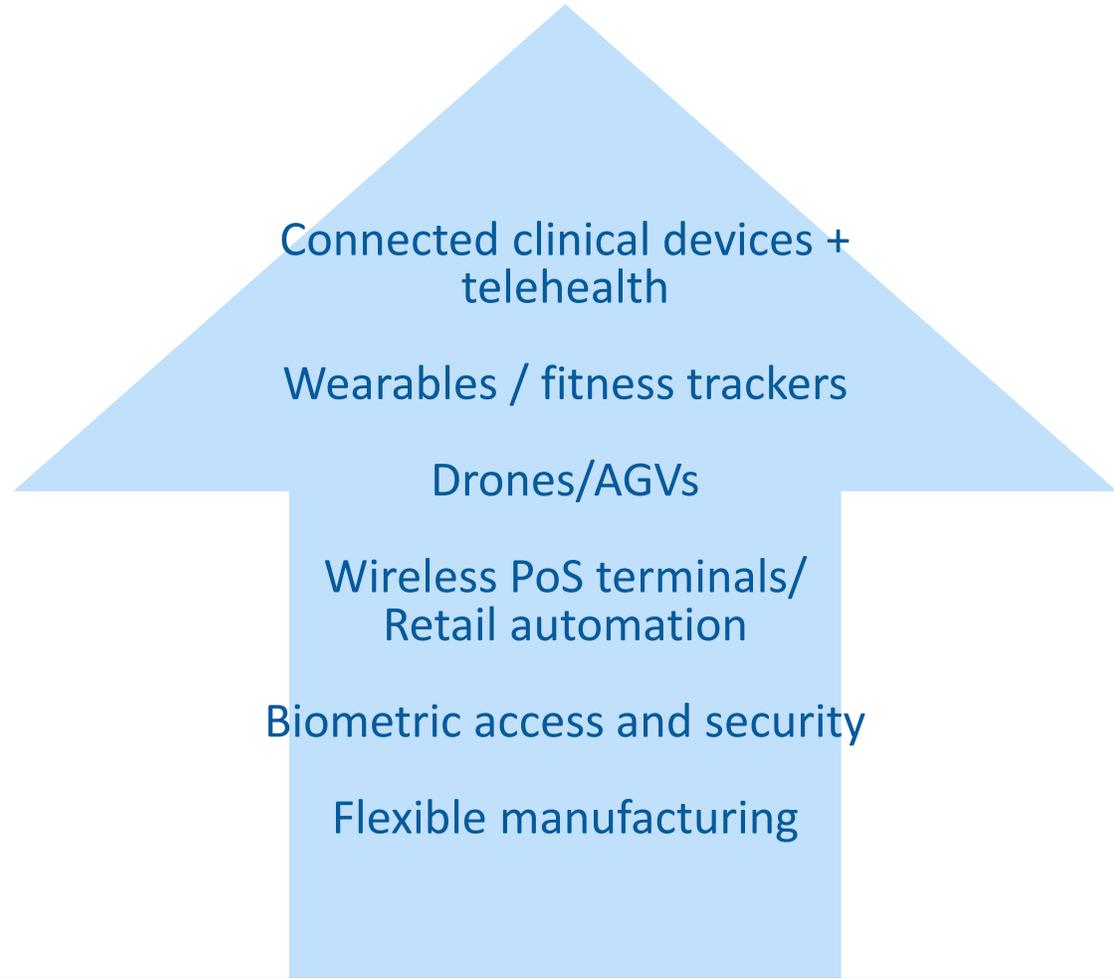

IoT encompasses a wide variety of applications and use cases

Main type of IoT application being deployed

Source: Omdia IoT Enterprise Survey 2019/2020

COVID-19 impact on IoT – challenge will be more on demand side than supply side, and impact more short-term than long-term

Examples of IoT in action in the COVID-19 environment

From connecting ad hoc hospitals to supporting rapid shifts in supply chains, IoT solutions are playing an important role in helping organizations and society meet the challenge of COVID-19

Source: China Daily/Reuters

Digital health/big data

- Kinsa: connected thermometer
- Telehealth/remote diagnosis

Smart helmets

- Kuang-Chi: public security & health AI-enabled helmets

Connected buildings

- Building access: video camera monitoring/facial recognition + temperature measurement

Robotics/autonomy

- Neolix: Driverless delivery/street disinfectant
- Hospital and transportation disinfection robots

Drones/UAVs

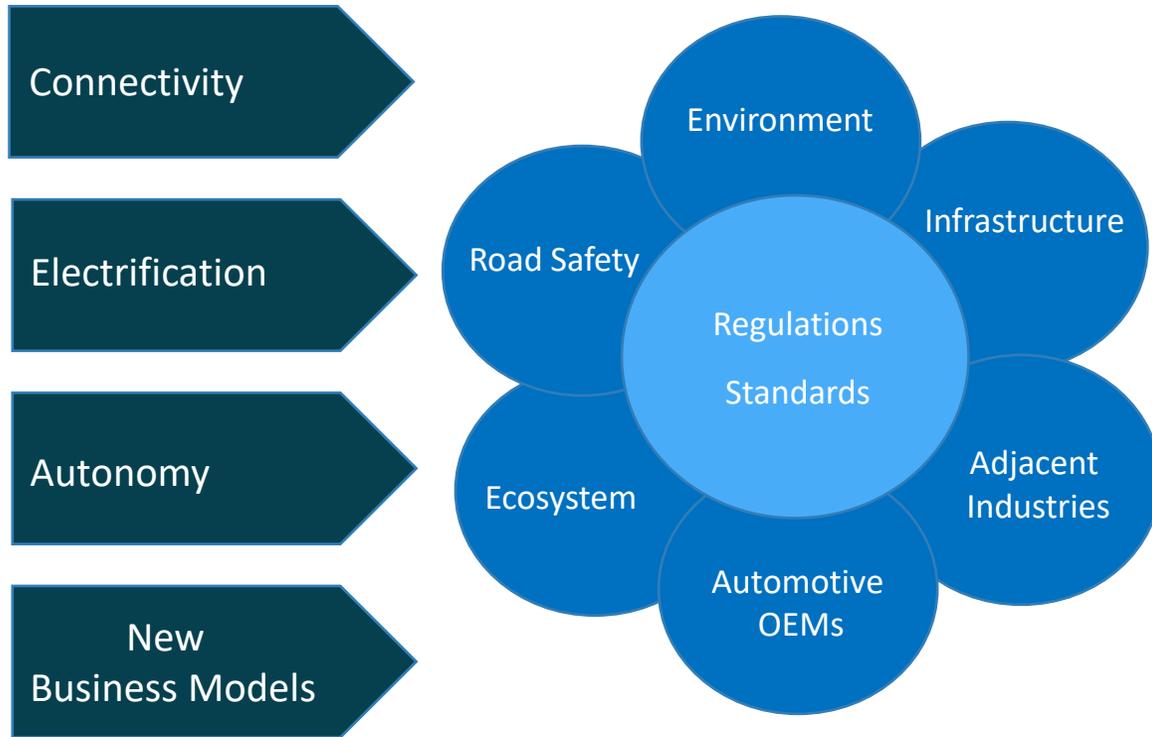

- ENAIRE/Madrid police: Public health warnings
- Thermal cameras for monitoring
- Disinfectant spraying
- Delivery of supplies/medicines

Contact tracing

- Estimote's 'proof of health' wearables for contact tracing
- Singapore's TraceTogether app

Connecting more devices creates complex ecosystems, global impacts

Connected Car: the Future of IoT & 5G

Shared Mobility In A City

The image shows a cityscape at night with several skyscrapers illuminated. Overlaid on the image are several text elements in yellow and white. A white speech bubble on the right contains a list of business impacts.

Ride hailing /Car sharing

Big Data and smart cities

Autonomous shared mobility

Dynamic shuttle services

Corporate car sharing

Business impact on adjacent and ancillary industries

- Insurance
- Dealerships & Services shops
- Vehicle repairs & Healthcare (90 % of accidents are human error)
- Driving schools – transitioning to autonomous
- Parking garages and lots
- Filling stations
- Media - Brands (12 car makers - \$42bn on advertising)

Not all IoT is highly complex - lower-cost technology solutions are enabling new smart city use cases

Low power wide-area technologies can be up to 5 times cheaper than traditional cellular – providers can be creative in what they ‘servitise’

Technology	Module Cost
SigFox	\$1-2 (single radio)
LoRaWAN	\$5-6 Nano-Tag \$2
NB-IoT	\$5 retail price T-Mobile USA
LTE-M	\$7-10 retail price (AT&T, Verizon)

Thank You

Knowledge, Skills and Attitudes

- IoT knowledge
- Data and statistics
- Strategy and business cases
- Proactive curiosity

INTERNET OF THINGS

Q & A

Business & Management Webinars and events – [icaew.com/bamevents](https://www.icaew.com/bamevents)

Free 60 minute webinars – 10.00am

How to network your way to success
13 May

Economic update
3 June

Better people management
8 July

Strategic thinking for senior professionals
30 September

Leading resilient teams
7 October

Practical Excel tips
7 December

Free 20 minute webinars – 12.30pm

Top tips for securing board level support for counter fraud
18 May

Simple techniques to improve communication
22 June

The net present value of happiness
23 September

Common online frauds and how to avoid them
14 October

Free evening events – 6.30pm

Creating clarity and impact in your reports and talks
10 September

Navigating 'office politics' positively
5 November
