

Digital Accounting Systems: An overview & roadmap for adoption

Matt Flanagan
@MattFlanBH

Agenda

- Intro
- Types of Add-ons/Apps
- Process for Apps with Clients
- The Journey with Tech
- Top Tips
- Q & A

Who am I?
Who are BlueHub?

Common Issues within Firms

**App
Overwhelm**

**Staff not
engaging with
the tech options**

**Not optimising
the apps
available**

**Reactive
Approach**

**Internal
Processes not
identified or
defined**

**No clear process
for apps**

**Firms don't
understand
client base well
enough**

E-Commerce

shopify

- E-commerce is now accessible to businesses of all sizes
 - Manageable without web developers
 - Access worldwide customer base
 - Estimated to £151 billion this year
- Integrates with inventory to update stock, improve reporting and automate order processing

Process for Selecting Apps for Clients

Top Tips

1. Concentrate on optimising efficiency apps for your firm first
2. Understand your client base or the types of businesses you want to work with
 - Reduce 650 apps in the ecosystem to 6!
 - Proactive rather than reactive
 - Don't let the tail wag the dog!
3. Internally agree your firms parameters as regards add-ons/apps
4. Find partners (Add-ons/Apps & Cloud Integrators) that can help you fulfil the service before you offer the service
5. Not every workflow needs an add-on/app
 1. Client not right
 2. Modified CoA could be enough

How we can help?

- Work with firms to:
 - Optimise internal platform
 - Client Segmentation & Visualisation
 - Implement processes for client apps/add-ons
 - App Selection assistance – not all 650!
- Work with businesses to:
 - Recommend systems based on client requirements
 - Implement systems (inventory, ecommerce, CRM and job mgmt. as a core)
 - Integrate systems with cloud accounting platforms
 - Support systems

*I have free
checklists -
ask me
about them*

Thanks!
